Both upper and lower 'wings' to be clearly defined with the central areas broken by small areas of ground colour. On the back an unbroken line should run down the spine from the butterfly to the tail, with a stripe on either side of this and running parallel to it; these stripes should be separated from each other by stripes of ground colour. On each flank there should be an 'oyster-shaped' patch surrounded by one or more unbroken rings. The tail to have complete rings, as numerous as possible, with the tip of the tail being the same colour as the markings. The legs to be barred evenly with bracelets from the body markings to the toes, which are spotted. The abdominal regions should also be spotted. Ground colour and markings to be evenly balanced and both sides of the cat should have identical markings.

Mackerel Tabby Pattern (23)

The tail rings, which should be as narrow and numerous as possible, may be complete or broken with the tip of the tail being the same colour as the markings.

COLOURPOINTED EXOTIC SH

There should be a good contrast between the points and body colour. Light body shading, if present, to be confined to the shoulders and flanks, and should tone with the points. The points (mask, legs, feet and tail) should be as evenly coloured as possible.

Note: The rate at which points colour develops in all Colourpointed Exotic SH is variable, the dilute colours taking the longest.

The mask should cover the entire face, including the chin and whisker pads; it should not extend over the head, although the mask of a mature male is more extensive than that of a mature female. The points should be free of white hairs and any areas of non-pigmented fur. Eye colour to be pure and decidedly blue.

SOLID POINTED COLOURS -The colour on all points should be evenly matched in tone and free from any sign of patchiness. Nose Leather, Eye Rims and Paw Pads to tone with points colour.

SEAL COLOURPOINTED EXOTIC SH (EXO n 33) - Points seal brown with toning creamy white body colour.

TABBY COLOURPOINTED - There should be a clearly defined 'M' marking on the forehead, 'spectacle' markings round the eyes and spotted whisker pads. The front legs have broken rings from the toes upwards; barring on the hind legs is confined to the front of the upper leg and thigh, the back of the leg from toe to hock being solid points colour. Ears solid but showing clear 'thumb marks' which are less apparent in dilute colours and mottled in the Tortie Tabby Points. Hair inside the ears lighter, giving the appearance of a pale rim; tail rings. Nose **Leather** pinkish outlined in pigment, or to tone with the points.
Eye rims and paw pads to tone with the points.
